

Waste less at your university with vegware™

Over 50% of UK universities use Vegware's eco packaging. With our support, you can up your recycling rates, lower your carbon footprint and communicate your sustainability to students.

1 Find the ideal recycling collector

Compostable Vegware is designed for food waste recycling. Vegware's Food Waste Network is a free service matchmaking any UK businesses with its ideal food waste recycling: www.foodwastenetwork.org.uk

2 Choose and label your bins

Vegware design bespoke bin signage to clearly communicate your recycling streams, helping to reduce contamination. Ask for our advice on bin systems and placement.

3 Communicate the system

We can provide posters, table talkers and work with your own communication channels to help shout about what you are doing.

4 Engage staff and customers

We'll get everyone on board with your new system, with our staff training and customer engagement at our popular 'green days'.

5 Communicate success

Count your environmental savings by the kilo with free tailored Eco Audits.

By using Vegware eco packaging, every month the University of Cambridge:

saves **1.5 tonnes** of carbon

saves **710kg** of virgin material

composts **1.5 tonnes** of packaging

the equivalent of
598 flights

from London to Paris
every year
