Sustainable Palm Oil

## About Us

At the University of Chester, we recognize our responsibility to function with due concern for the environment and to minimize the impact that our activities have on the planet.

# What did we know about Palm Oil before we were involved in the Chester Zoo Project

## Our Mission

Our Sustainable Food mission is to ensure that the University of Chester leads by example, putting sustainability at the heart of decision making and service delivery.

- Do a little bit of research about palm oil in the products you use and the types of products that could contain unsustainable palm oil

Palm oil is predominantly used in confectionery, breads, pastries, margarines, and spreads.

Cleaning products, cosmetics and personal care:

Cleaning products contain oil-based chemical derivate in the form of oleo chemicals.

Tell your supplier what you are  
doing!

Ask them if they have a  
Sustainable Palm Oil Policy?

# Palm Oil Challenge

## Make one Change

Check your products for use of palm oil and make one change from a product that contains unsustainable oil to one that contains sustainable oil. If you only sell sustainable palm oil products then that is great – you don't need to make a change.
